

ANALYSIS QUESTIONS:

1. List by buoy site which organisms would live there and tell why.
2. What effect do salinity and temperature have on sea grasses?
3. What effect do salinity and temperature have on other types of organisms?
4. If given certain information about salinity and temperature, could you determine if other organisms you didn't select would live at your buoy site? How?
5. Do you think that all aquatic organisms require the same salinity and temperature to survive? Explain your answer.
